# D-SUB | MICRO-D AXON' BACKSHELLS EASY CABLING AND EMI\* PROTECTION

## OUR EXPERTISE

*Backshells: your protection against electromagnetic interferences*

Any equipment can be affected by the presence of EMI. To solve this issue, Axon' offers not only optimised connections, but also backshells. True allies against interferences, they are directly placed behind the connector and protect the link, thus increasing performances. Backshells made with different materials, sizes and plating are available for your specific applications.

\*EMI : Electromagnetic interferences

## MAKE THE RIGHT CHOICE

**Easy cabling:** easy mounting, optimised installation, and quick modification if necessary

**Compliant** with standards  
(Sub-D: MIL-DTL-24308  
Micro-D: MIL-DTL-83513)

**Made In Axon'** design and manufacturing

**Custom-designed solutions:** a lot of possibilities thanks to a large choice of funnels, surface treatments, accessories...

**Optimisation:** monobloc or modular format in 3 parts: direct access to the wiring space, and purchase of single parts is possible

**Several thousand references in stock.** Contact us for any emergency

**Hotline:** our experts at your disposal: advice, optimisation, alternatives...

## ACCESSORIES:

CLOSE TO YOUR NEEDS

*To go further, Axon' offers a range of accessories compatible with Sub-D backshells.*

**Hardware:** build your system to your own mounting requirements.

**Axoclamp®:** clamping bands allows for a -360° shield termination at the rear of connectors.

**Halorings:** Comb for shield grounding of a cable composed of several wires and shielded pairs. Direct connection between the Sub-D connector and the shell or on the connector.

**Axotress:** braid designed to improve the EMC performances.

**axon'**
